### **DETAILED ACTION**

1. This action is in response to applicant's amendment received on February 12<sup>th</sup>, 2008.

#### ***Information Disclosure Statement***

2. The Information Disclosure Statement (IDS) submitted on November 9<sup>th</sup>, 2007 is acknowledged. The IDS meets the requirements of 37 CFR 1.97 and 1.98. Therefore, the references therein have been considered.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 4 and 5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement for the same reasons set forth in paragraph 3 of the previous office action mailed November 16<sup>th</sup>, 2007. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant's remarks regarding the features of claims 4 and 5 have been fully considered but are not deemed persuasive. Applicant states that one of ordinary skill in the art would know that such flexibility is inherent with C-shape structures. However,

Art Unit: 3721

while examiner understands Applicant's statement of the links being flexible due to a certain amount of elasticity, there still is no support for any flexibility of the links anywhere in the originally filed disclosure. In addition applicant provides no factual evidence for applicant's position. Therefore, due to the level of indefiniteness with regard to claims 4 and 5, action on the merits can not be properly made at this time.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 1, it states that the "table link and the fixing plate are relatively moveable." However, there is no point of reference and therefore it is unclear what the table link and fixing plate are relatively moveable to.

### ***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Udagawa et al (5,791,543) and Admitted Prior Art.

Udagawa discloses the same invention as discussed in paragraph 5 of the previous office action, *supra*.

Regarding the amendment to claim 1, Udagawa fails to disclose the table link and fixing plate being separate members. However, the examiner takes Official Notice that it would have been obvious to form a structure as two separate parts, since it has been held that constructing a formerly integral structure into various elements involves only routine skill in the art (see MPEP 2144.04). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to form the table link and the fixing plate as two separate members in order to facilitate assembly of the device.

### ***Response to Arguments***

9. Applicant's arguments filed February 12<sup>th</sup>, 2008 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

11. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3721

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
